Figure 1 shows a schematic diagram of a 2D hexagonal lattice. The lattice is composed of solid black circles representing atoms. A central atom is labeled 'A'. To its right is an atom labeled 'B'. Above 'A' is an atom labeled 'C'. Below 'A' is an atom labeled 'D'. To the left of 'A' is an atom labeled 'E'. To the right of 'B' is an atom labeled 'F'. The lattice is bounded by a dashed line. The top boundary is labeled 'z=0'. The bottom boundary is labeled 'z=a/2'. The left boundary is labeled 'x=0'. The right boundary is labeled 'x=a/2'. The vertical distance between the top and bottom boundaries is labeled 'a/2'. The horizontal distance between the left and right boundaries is labeled 'a/2'.
